PROJECTS

Full-Stack Web Application 2026

Node.js · Express.js · SQL · JavaScript

- Built a RESTful backend API with Node.js and Express.js, connected to a SQL database.
- Implemented CRUD operations, user authentication and data validation.
- Applied data structures and algorithmic thinking to improve query performance.

ShopVibe: Online Store 2026

HTML · CSS · JavaScript · Fake Store API · ecommercecatalog-puce.vercel.app

- Built a responsive store that loads products from an API, with category filters, sorting and a shopping cart with checkout.
- Handled API errors inside the product grid and updated the cart without re-rendering the whole page.

Weather Forecast App 2026

HTML · CSS · JavaScript · OpenWeatherMap API · weather-forecast-eight-umber.vercel.app

- Shows current weather and a 5-day forecast for any searched city, with a background that changes to match the weather.
- Shows clear messages when a city is not found or the request fails.

Developer Portfolio Website 2026

HTML · CSS · JavaScript · portfoliokennaget.vercel.app

- Designed and built a responsive, mobile-friendly portfolio with a dark/light theme that remembers the visitor's choice.
- Deployed on Vercel so recruiters can open live demos of my work.
